

GIS Mapping Services Pricing

Project Development \$50/hr

(includes data collection/analysis, data layer development, map layout, and changes to project)

Printing:

8.5"x11" B+W Laser	\$0.05
8.5"x11" Color Laser	\$0.20
11"x17" Color Laser	\$0.40
3' wide Color Inkjet	\$2/ln.ft

Electronic Formats:

PDF (Adobe)	Free
Most image formats	Free

Available Data for Presentation:

Aerial Photography

- 1997 B+W: Statewide
- 2001-2004 Color : Year and availability varies by region (2003 Color shown above)

Hydrography: lakes, streams, etc (USGS, OGIS)

Political: political boundaries, town names, etc (USGS)

Contours: contains contour lines for Maine (USGS)

Soils: digital soil survey data for Maine (USDA, NRCS)

Roads: state, town, private, E911 (OGIS, MDOT)

Customer Defined: point, line, or polygon data representing real-world features can be created to suit a customer's needs. For instance forest cover-type boundaries, field boundaries, hiking trails, or farm stand locations can be created for various planning activities.

Data Source: Most data has been acquired through the Maine Office of GIS. Much more data is available for download than listed above. To browse available datasets to see if they meet your needs go to:
